PhoneBOX VX

Whatever your question, we've got the answer..

"No other comparable solution offers the same functionality, resilience and flexibility. It's the linchpin of our broadcasting capability."

Bruce Davidson, Global Radio. UK*

Introducing PhoneBOX VX

PhoneBOX VX builds on the global experience and award winning design of the PhoneBOX family of talkshow software. It seamlessly integrates with the incredible new Telos VX engine and handsets to answer, screen and route calls faster and better than ever before.

The intuitive PhoneBOX VX user interface keeps you informed at a glance and in control with a single touch.

PhoneBOX VX constantly captures useful and important data so you can manage even the most complex contests and talkshows effortlessly.

More than just a phone management tool, PhoneBOX VX enables you to integrate callers, emails, SMS, codecs and contest management.

PhoneBOX VX records every call and provides a split track editor for rapid production of recorded segments. It even acts as a VoIP phone so you can screen calls directly from your PC.

PhoneBOX VX makes sure you only ever get the very best callers on-air and powered by the Telos VX they will all sound fantastic. Whatever your music format, talkshow topic or contest question PhoneBOX VX is the perfect answer.
